

# HOW CHECKS ARE DEPOSITED IN THE 21ST CENTURY

**ADVANTAGE DEPOSIT 24** is a modern and amazingly fast alternative to having someone from your company stop work and physically deliver check deposits to the branch. Our solution is two fold: PC-based for large volume needs or Internet-based for smaller clients, both options provide the most efficient operation at minimal cost while allowing anyone from your company at any of your business locations to deposit checks directly into your business account.

Here's how Advantage Deposit 24 works: **ADVANTAGE DEPOSIT 24** is deployed at any of your business locations, utilizing a low-cost check-imaging scanner that we provide you, checks for deposit are scanned and their images captured on the computer. After verifying the images and balances, everything is transmitted via the Internet and a secure file transfer using the Advantage Deposit 24 File Utility. Your deposit is credited to your accounts. It's that fast and simple.

The Advantage Deposit 24 solution supports capturing and processing traditional check deposits. And, Advantage Bank will configure the application to meet your business's specific processing needs.

## Benefits of **ADVANTAGE DEPOSIT 24**
